

Kozakura Shokai Co., Ltd. Receives ISCC PLUS Certification

Kozakura Shokai Co., Ltd. (Minato-ku, Tokyo; President: Seiichiro Maeda) has updated ISCC PLUS certification, an international system for sustainable products in 07 Dec, 2025.

ISCC (International Sustainability and Carbon Certification) has already been widely adopted in Europe, primarily as a biomass certification system, and ISCC PLUS certification uses a mass balance approach* to trace and guarantee products such as biomass or renewable feedstocks in supply chains.

*: A tracking and bookkeeping approach for products with both sustainable materials derived from biomass and non-sustainable materials derived from fossil fuels. It is a method of allocating sustainability to parts of a product according to the amount of sustainable raw materials input.

We hereby promise to comply with the ISCC PLUS requirements in accordance with the latest ISCC regulations. We also hope to contribute to the realization of a sustainable society by popularizing ISCC certified products.
